

Find the right candidates with the right skills for the right job.

Today, more than ever, SC businesses are challenged to find the best ways to find, hire and retain workers with the right skills. WorkKeys meets the challenge.

WorkKeys is a comprehensive, legally compliant solution developed by the American College Testing program for selection, promotion, recruitment and training.

The WorkKeys system begins with a job profile to determine the tasks and skills critical to performance. Assessments measuring workplace-based skills then place your incumbent and prospective workers on a common scale. Our training program offers targeted curriculum to close skills gaps between the job and the employee or candidate. Finally, our **JOBReady!** certification card documents employability and rewards WorkKeys performance with a proven credential.

WorkKeys helps you hire and retain qualified employees and offers these benefits to your bottom line...

- » Affordability
- » Equal Opportunity Employment Commission, Americans with Disabilities Act and International Organization for Standardization compliant
- » Increased productivity
- » Reduced turnover
- » Increased profit
- » Reduced overtime
